

How To Take a Signal in 3 steps.

1. Signal comes to your phone, In this example this is USDJPY with SL/TP targets with also the risk to reward ratio.

A screenshot of a mobile application interface. At the top, there is a blue header bar with a white back arrow on the left and the text 'Live Signals & Updates' in white. Below the header, the background is black. The main content area displays a 'Buy Signal: USDJPY' in white text. To the right of the text are two small white line charts showing an upward trend. Further right, the date '12-29-2023' is shown in white, with '3 days ago' in a smaller white font below it. Below the signal text, the following information is listed in white: 'SL 140.895', 'TP 141.490', 'TP 142.000', and 'Risk: -40pips Reward: +70pips'.

2. Go to the quotes page, tap on on the pair and click “**Trade**”

A screenshot of a mobile application interface showing a trade confirmation dialog. The dialog has a dark gray background. At the top, it says 'USDJPY: US Dollar - Japanese Yen' in white. Below this, there are four buttons: 'Trade' in red text, 'Chart' in blue text, 'Details' in blue text, and 'Cancel' in blue text. At the bottom of the screen, there is a navigation bar with five icons: 'Quotes', 'Chart', 'Trade', 'History', and 'Settings'.

3. Enter your lot size, SL number in the “Stop Loss” field and enter the TP number in the “Take Profit” field according to the signal (*One trade can be entered at a time, if more than one TP, then enter another trade*). Hit either “Sell by Market” or “Buy by Market” depending on the signal.
